

The Lifecycle of a Plant

Do you know how a tiny little seed becomes a fully grown plant?
Cut out the pictures below and match them to the correct stages to discover the lifecycle of a plant!

These flowers
are then
pollinated which
produces
more seeds

A seed is planted

The seed is
watered so it
can grow

The seed begins
to germinate,
it grows shoots
and roots

The plant
grows and
produces flowers

Once you're finished why don't you cut out the lifecycle and stick it on your wall?
